

Triton's Oscillating Spindle Sander offers outstanding performance and a precise finish to every project, whilst stability and enhanced material support is provided by the 370 x 295mm / 14 1/2" x 11 1/2" cast iron table. The oscillating action moves the drum up and down during rotation, reducing static friction that causes burning and eliminates band marks. Delivering a professional finish to internal as well as external profiles, the TSPS450 is well-equipped to allow the matching of the optimum sleeve size for the precise needs of every woodworking project.
