

VanZyverden's
VIBURNUM STERILE 4" POTTED ROCKETLINERS®

Rocketliners® are sized, shaped and rooted throughout the pot with strong and responsive roots. Gardeners can expect a finished healthy plant within a single growing season. They have greater fresh root mass and vertical root training which promotes faster finishing times. While it can often take up to 3 years for a shrub or vine to get fully established growing from bareroot, Rocketliners® may only take 12 months, saving you up to 2 seasons of waiting time. Rocketliners® are for gardeners that have busy lives, little time to waste and want to start out with the best planting stock.

*very versatile, and
good for mass plantings*

*great as a screen, informal hedge,
planted en masse or used as a filler*

*shrubs are the
cornerstone of landscapes*

About This Variety: Viburnum opulus 'Sterile' is a deciduous shrub, which is vase-shaped, gracing southern gardens for generations. Snowball produces lots of color in summer, make for excellent cut flowers and a perfect choice for mass plantings. A very versatile choice. Big white snowball type flowers adorn the plant in late spring. Bright green foliage turns to reddish purple in the fall.

Growing Instructions: Dig a hole two times the width of the Liner pot. Set top of root ball even with ground level. Combine planting mix and garden soil. Fill to ground level and tamp down firmly. Water to settle soil. Add layer of mulch to retain moisture and discourage weeds. Water regularly for the first year, then as needed once established. Feed with a quality fertilizer following application and frequency instructions, typically just before and during the bloom season.

Care Tip: Prune to maintain shape.

Exposure: full sun

Height: grows 6-8' tall

Spacing: plant 4-6' apart, setting root ball even with ground level

USDA Zones: hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
