

Matters Needing Attention

Electrical Safety Instructions

INSTALLATION has to be made by a qualified / registered electrician.

LED LIGHTED MIRROR

Thank you for purchasing this product. Before using the product, read through this user guide to ensure that you will use the product correctly. Please keep this guide for further reference.

Important

Read this instruction carefully and refer back to them during installation to ensure that your product is fitted safely and correctly.

Always switch off the electrical supply at the mains during installation and maintenance. It is recommended that the fuse is withdrawn or the circuit breaker is switched off for the necessary circuit before installation.

Fitting in Bathrooms is subject to the appropriate zone in accordance with IEE Regulations. This product is suitable for zone 2 and outside zones. IT IS NOT suitable for installation in Zone 0 or Zone 1. It is also not suitable for installation in saunas, steam rooms or shower cubicles. This product is only suitable for permanent installation. DO NOT connect to a trailing plug and socket outlet. Although this product has an Ingress Protection rating of IP44 it is only suitable for indoor use. Do not attach the product to surfaces that are damp or otherwise electrically conductive.

Installation Care & Safety

Wear suitable eye protection when drilling. Take care when using power tools near water - the use of a residual current device (RCD) is advised. Beware of hidden cables or pipes. Take care if drilling on tiled surfaces in case the drill slips. A piece of masking tape applied to the wall before marking out the fixing holes will stop the drill from wandering.

DO NOT strike glass components with hard or pointed items.

DO NOT place very hot or very cold items against or in close proximity to glass surfaces unless an adequately thick insulation material is used to prevent such items coming in contact with the glass.

The nominal thickness of the mirror glass used in this product is 5mm. If the glass becomes chipped or broken replace immediately.

This product should be positioned well away from curtains and other fabrics.

Never cover the mirror. This product is heated, we recommend that it is turned off after use and should never be left on for prolonged periods of time.

This product could be dangerous if installed incorrectly.

PLEASE RETAIN THIS INSTRUCTION LEAFLET FOR FUTURE REFERENCE.

Cleaning

WHEN THE MIRROR MUST BE CLEANED, IT IS NECESSARY TO SWITCH IT OFF FIRSTLY!

DO NOT use abrasives or solvents when cleaning this product. Wipe off all water

spillages as soon as possible using a soft, damp cloth.

DO NOT submerge mirror in water, do not let go of water in the mirror.

Compliance

All electronic components used in this products are UL listed.

Wiring

This product is designed and manufactured in class II category, no need earth connection. The product need hardwired with the supply cable lead from the wall. Also we provide extra 1.5m U.S. 2-pin plug for easy connection with exist wall socket.

Lights Controls & Memory Function

The integrated LED light source and system are not support to replaced by consumers, please DO NOT change by yourself.

The lights (and defogger) are controlled by touch sensor on mirror surface to turn on/off and adjust brightness and color temperatures.

Keeping the mirror lights on, then you also could control it on & off by wall switch, if connect with it. The last working condition before switching off would be kept while turn on again, either brightness level or color temperature.

Noted: Our mirrors just support standard wall switch control, can not dimming by a dimmer wall switch!

DANGER - To reduce the risk of electric shock:

Always unplug this product from the electrical outlet before cleaning or servicing.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons:

- 1) Unplug from outlet before putting on or taking off parts.

Hold on pressing this button with 3 seconds, the mirror will enter standby state, the mirror and touch button will turn off. Press any of the three buttons or turn on the wall switch again can wake up the mirror and will return to the state before standby.

Installation Procedure

Before starting your installation, please make sure:

- The wall surface must be of suitable strength and construction.
- The main electricity supply has been power-off.

Step I.

Mark the hole Mark the hole positions (A - B for Vertically hanging, A - C for Horizontal hanging) by provided Hanging Template and Mini Level in the package.

Before drilling, ensure there are no hidden cables or pipes behind the mounting points.

Step II.

Drill holes in the marked positions to a suitable depth, and then use a handle screwdriver to insert wall plugs provided.

Step III.

Use a electric screwdriver to insert screws provided, leave approximately 5-10mm of the screw standing proud of the wall.

Step IV.

Find the input cable with two connectors equipped on the end. Make connections with filed wire, Neutral to white and Line to black.

This mirror was designed and produced according to CLASS II level (Double insulation), no need ground wire connection.

Ensure all connection are tight in place.

Step V.

Carefully hold the mirror and mount it onto the screws fitted to the wall. Ensure the mirror is securely mounted.

Note: To remove the mirror, the mirror should first be lifted and then pulled away from the wall.
