

Methylene Chloride Information Sheet

DO: Use non-flammable Methylene Chloride Paint Removers:

- In a well ventilated area
- With the proper protective equipment
- To strip nearly any coating from a variety of substrates

DON'T: use Methylene Chloride Paint Removers:

- Without proper protective equipment
- In enclosed spaces such as bathrooms, bathtubs, basements, or in any area with poor ventilation

If used in such areas, the methylene chloride can pose a significant risk of injury or death due to inadequate circulation of fresh air into the work area.
