

Thank you for choosing this USB Charger from BESTEK store, please read this user manual carefully before using and it will help you use the product safely and easily.

This power plug apply to US market with input voltage 100~240V AC/60Hz and 5ft UL Certified power cord, it can be mounted into the dock or taken out as a portable power source. It comes with 3 AC outlets and 4 USB ports, the USB outputs featuring 3 USB-A ports and 1 USB-C port which are controlled by a separately lighted power button. The power button can be used to turn on/off the AC outlets. With safety protection door switch, it can effectively prevent the electric shock caused by children. This product has automatic identification function when connected to a mobile phone, built-in communication handshake chip can automatically identify the type and model of the phone, so that speed up charging the mobile phone.

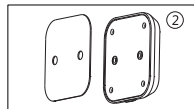

AC Input	13A 100~240V~ 60Hz 1625W
USB Output	USB-C:5V $\Rightarrow$ 3A(Auto)
	USB:5V $\Rightarrow$ 2.4Ax3(Auto)
	USB Output Power:25W(Total)
Protection Features	USB Output Over Voltage Protection
	USB Output Over Current Protection
	USB Output Short Circuit Protection
	USB Output Overload Protection
Joule Rating	300J
Socket Structure	3-Outlet Power Strip with 4-USB Charging Ports
Environmental Temperature	Operating:-10~40°C Store:-20~80°C
Environmental Humidity	Operating:From 10% to 90% relative humidity (non-condensing) Store:From 5% to 95% relative humidity (non-condensing)
Cover's Materials	ABS UL94V-0
Power Cord Length	1.5m
Product Size	85.0 x 86.0 x 80.0mm
Product Weight	436 $\pm$ 10g

- **QAC Power Expansion:**
 - 3 surge-protected AC outlets with 4 USB charging ports allow you to power all your devices at once.
- **QUSB-C Port:**
 - Offer the latest and the fastest charging speed (5V/3A max) for MacBook 2015, HTC 10, Nexus 6P, LG G5, Lumia 950, Lumia 950XL, Nokia N1, ASUS Zenpad S 8.0 and other 5V type-c supported device.
- **Fast Charging Technology:**
 - Three Smart USB Ports auto detect your device and supply the fastest available current to the device.
- **Lighted Power Button:**
 - The USB output was controlled separately by a lighted power button, you have to press the button on before charging and press it off after finish to save the power consumption.
- **Multi-Protection Safety System:**
 - With built-in over-current and short circuit protection, the USB ports stop charging when overloaded and the indicator on the power button blinks as a reminder.
- **User-friendly Design:**
 - Underneath the power button enables you to place it anywhere, even upside-down beneath your desk or on a wall. You may either use the supplied screws or 3M tapes to install the dock easily to right place you want. Also you may detach the Power Strip out of the dock to use it as a portable power source.

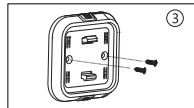

1: You can take the power strip out of the dock by pressing the latches on both sides at the same time. The power strip can be easily and tightly attached to the dock both horizontally and vertically (as Picture 1).

2: Peel off the double-sided tape's liner and stick the double-sided tape onto the bottom of the dock, then peel off the other side's liner, and stick the dock to the right place (as Picture 2).

3:Also you may install the dock by screwing it into the place you want (as Picture 3).

The diagram illustrates the components of the system, showing the connection between the main unit and the subunit. The main unit (top left) includes a display (1) and a control panel (2). The subunit (bottom right) includes a display (3), a control panel (4), and a sensor (5). The subunit is connected to the main unit via a cable (6). The subunit also includes a sensor (7) and a control panel (8). The subunit is connected to the main unit via a cable (9).

- 8: USB 5V $\overline{\text{---}}$ 2.4Ax3(Auto)
- 9: USB-C Port 5V $\overline{\text{---}}$ 3A(Auto)

- ◆ 1 x BESTEK Vertical USB Power Strip
- ◆ 1 x User Manual
- ◆ 1 x Double-sided Tape
- ◆ 2 x Screws

- ◆ Please make sure all the connected devices are within the acceptable total range of voltage and current in case of damaging device.
- ◆ It's normal for the Power Strip to be a little warmer when you use it to charge multiple devices at the same time.
- ◆ When your device run out of the battery and power off, some devices may be charged a little slower at the beginning because of the battery protection from your device.
- ◆ Please avoid beating or crashing the Power Strip.
- ◆ Always keep away from heat sources and water in case of short circuit. Please keep the power strip away from children.

TO REDUCE THE RISK OF ELECTRIC SHOCK,
USE ONLY INDOORS. RISK OF ELECTRIC
SHOCK-DO NOT PLUG INTO ANOTHER
RELOCATABLE POWER TAPS. USE ONLY IN
DRY LOCATION.

Indicator Status	Product Status	Solution
Blue	USB ports work normally	Normal
Blue Flashing	USB output overload protection	Please check if there is one USB port overloaded
Light off	USB output cut off	Please check if the all USB devices are overpower and reduce the total load then

Our company provides customers with 18 Months warranty from the date of purchase.
