LIMITED GROWTH & FLOWERING GUARANTEE

Garden State Bulb Co. (GSB) products have been grown with the utmost care and are of excellent quality. In order to obtain the desired end result, it is important that the instructions on our site and/or the accompanying (plant) instructions are followed. Given that we work with a natural product; we offer a 1 Year Limited Growth and Flowering Guarantee.

Garden State Bulb's obligation under this Guarantee is limited to troubleshooting, replacing the product, missing pieces or providing a gift certificate at Garden State Bulb's discretion. All products for which a Guarantee claim is made must be received by GSB and accompanied by sufficient proof of purchase (emailed or original physical store receipt, indicating the date of purchase).

This Guarantee does NOT cover improper handling, storing, weathering, failure to follow directions, improper care, improper maintenance, or acts of nature, (such as damage caused by wind, lightning, snow, water, or ice), or damage caused by improper use of the products are not covered by the product warranty. No other guarantee beyond that specifically set forth above is authorized by Garden State Bulb Co.

BLOOM TIME	Summer/Season Long Foliage
LIGHT	Partial Sun to Partial Shade
SPACING	12" to 24" apart
DEPTH	Plant 6" deep
MATURE HEIGHT	24" to 40" tall
BENEFITS	Deer Resistant

Soil Preparation

Great gardens start with great soil!
Soil preparation is essential for successful gardening.

Healthy soil should have good tilth, nutrient content, and a viable population of beneficial microorganisms. We recommend using natural and organic ingredients to prepare the soil and maintain soil fertility. It is always a good idea to have a soil test to identify your soil type (sandy, loam, silt, clay) and find out your soil pH.

NOTE: It is important to store correctly until planting. Store in a cool, dry place with plenty of air circulation. Plant in spring as soon as ground has thawed and soil has warmed to 50°F and is workable. Usually 4-6 weeks after the last frost.

Elephant Ear Planting Instructions

- 1 Before planting, outside temperature needs to be at a minimum of 45°F at night and 70°F in daytime.
- 2 Choose a location with well-drained soil. Loosen soil prior to planting.
- 3 Dig a hole in loosened soil 2 to 4 times the size of the bulb (about 6" deep). Place bulb with the blunt side facing down and any sprouts facing up.
- 4 Plant Elephant ear bulbs so the top of the bulb is about 1-2" below the soil surface and each bulb about 12-24" apart.
- 5 After planting, water well so that the soil above the bulbs settles. Keep soil moist during periods of dry weather but do not overwater.

*Elephant Ears will start growing once the soil temperature reaches 65°F or warmer. In cooler climates (zones 3-8), Elephant ears will grow as an annual.

About Elephant Ears

Garden State Bulb Premium Hawaiian Punch Elephant Ear bulbs are 9 to 11 inches in circumference and carefully hand-picked and checked for quality before shipment. Primarily grown for its spectacular foliage and glossy red stalks, Hawaiian Punch Taro is a tuberous perennial with velvety, heart shaped leaves that resemble an elephant's ear. The large green leaves also have beautiful contrasting red veins on the underside which provides a unique focal point that is sure to turn heads! This perennial prefers moist areas that are located in filtered sun to partial shade and will add an exotic, tropical look to any garden or patio. Easy to grow and an excellent plant for containers that can be brought indoors during the winter in cooler zones.

FREQUENTLY ASKED QUESTIONS

Q. Do larger elephant ear bulbs mean larger plants?

A. Yes, the larger the bulbs, the larger the plants with more foliage.

Q. Can elephant ear bulbs be left in the ground?

A. Elephant ears can stay in the ground if you live in hardiness zones 7 through 11 during the winter months.

Q. How cold can elephant ears tolerate?

A. Elephant ears can tolerate temperatures above 45° Fahrenheit.
