- Hamper height: **22"**
- Load capacity: **55 lbs**

Included Components

Fabric hamper with frame

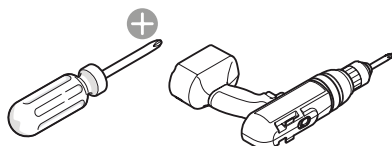

Left & right soft-close rails

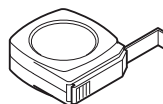

Mounting screws

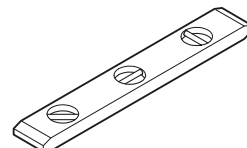

Required Tools

Phillips screwdriver or drill

Tape measure

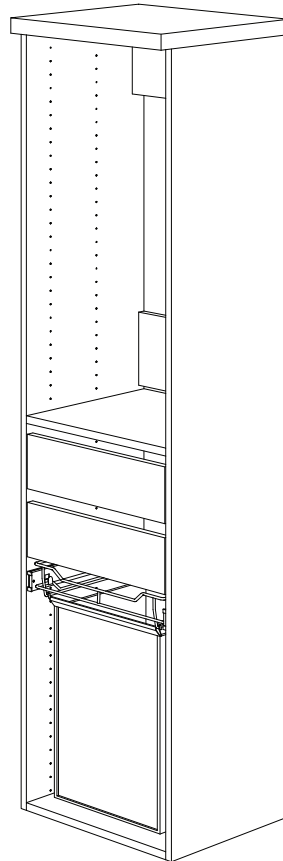

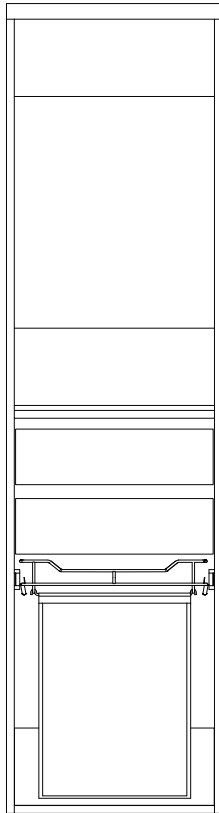

Level

Installation Steps

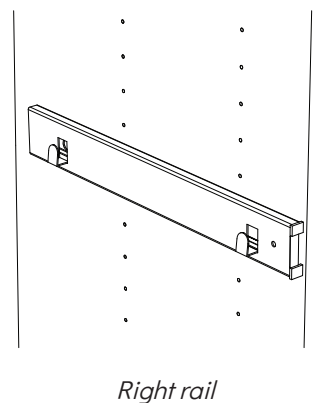

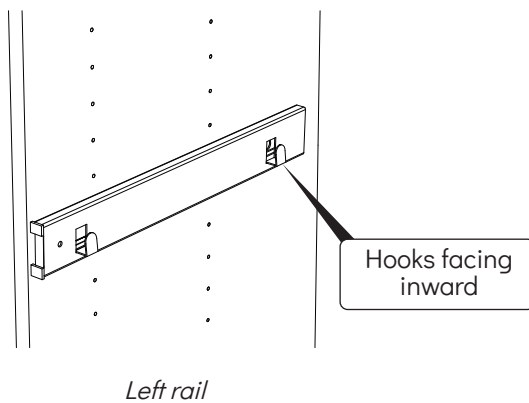

1 Select Position

- Choose hamper location inside cabinet.
- Ensure clearance above and below.

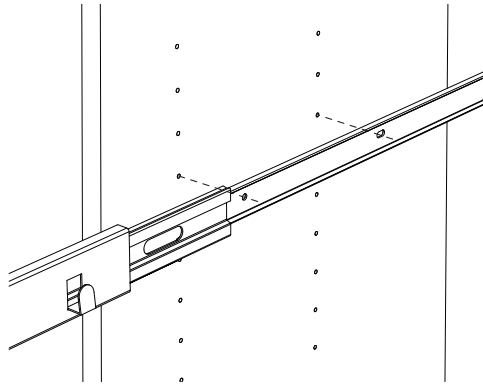

2 Align Rails

- Identify left and right rails:
 - Left rail mounts to the left panel, with hooks facing inward.
 - Right rail mounts to the right panel, with hooks facing inward.

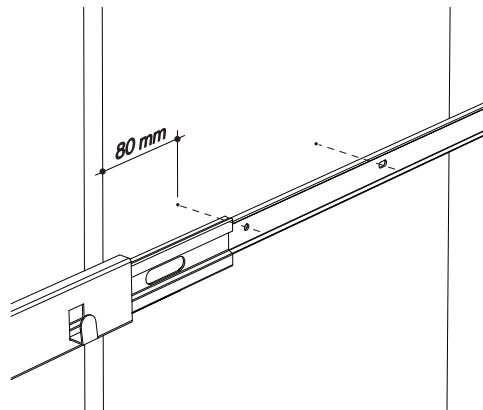

Installation Steps

- In supplied cabinets: match rails to pre-drilled holes.

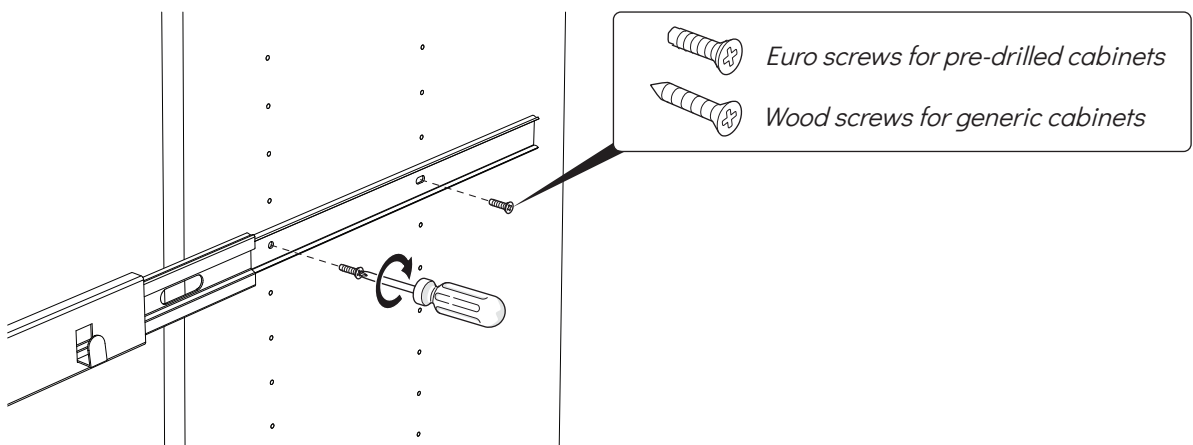

- In other cabinets:
 - Measure 80 mm (3 1/8") from the cabinet front edge and mark the front mounting hole.
 - Position the rail at this mark, ensure it is level.
 - Use the rail itself as a template to mark and drill the remaining rear mounting hole.

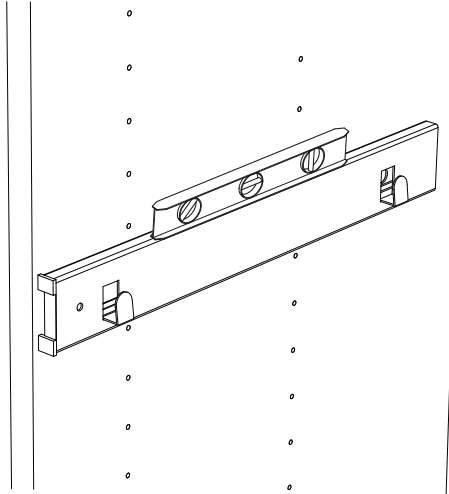

3 Fasten Rails

- Secure slides with provided screws.

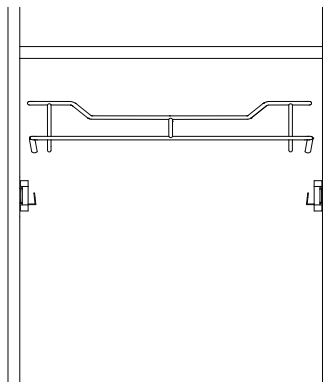

Installation Steps

- Confirm both sides are parallel and level.

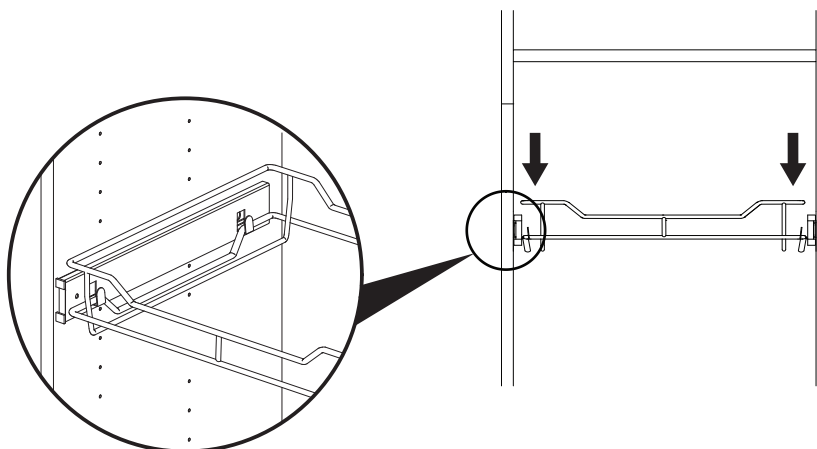

4 Clip Hamper

- Position hamper frame onto rail hooks.

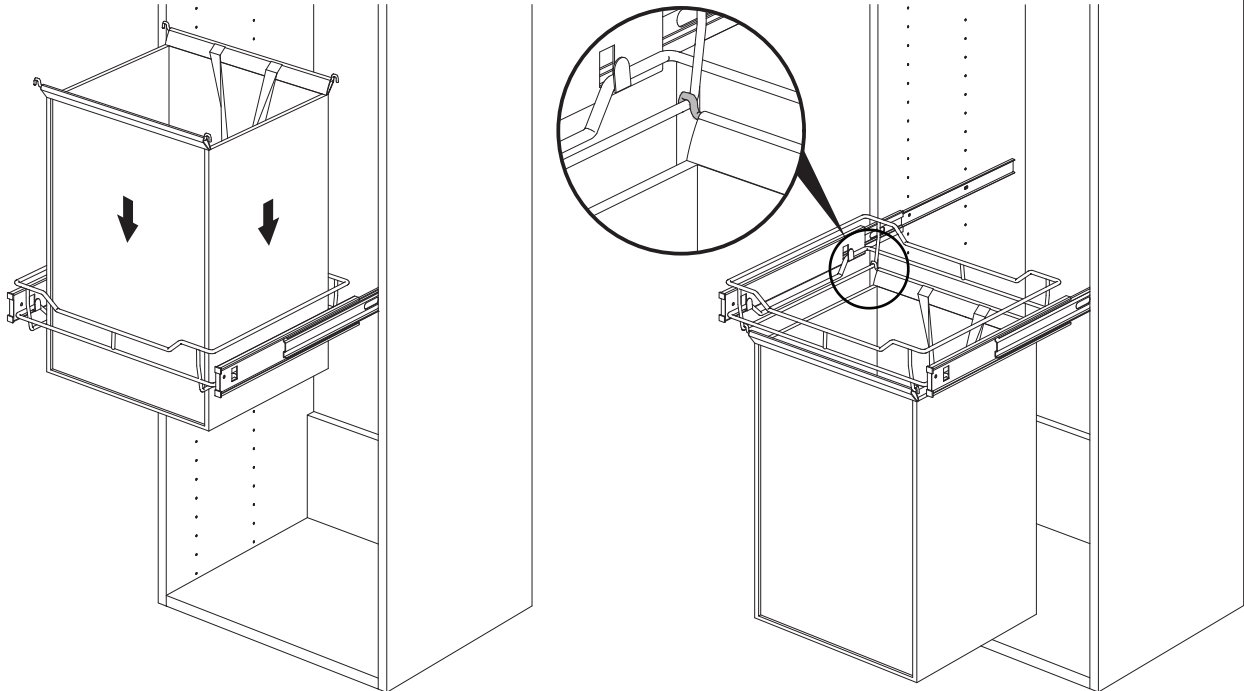

- Push down until it clicks securely in place.

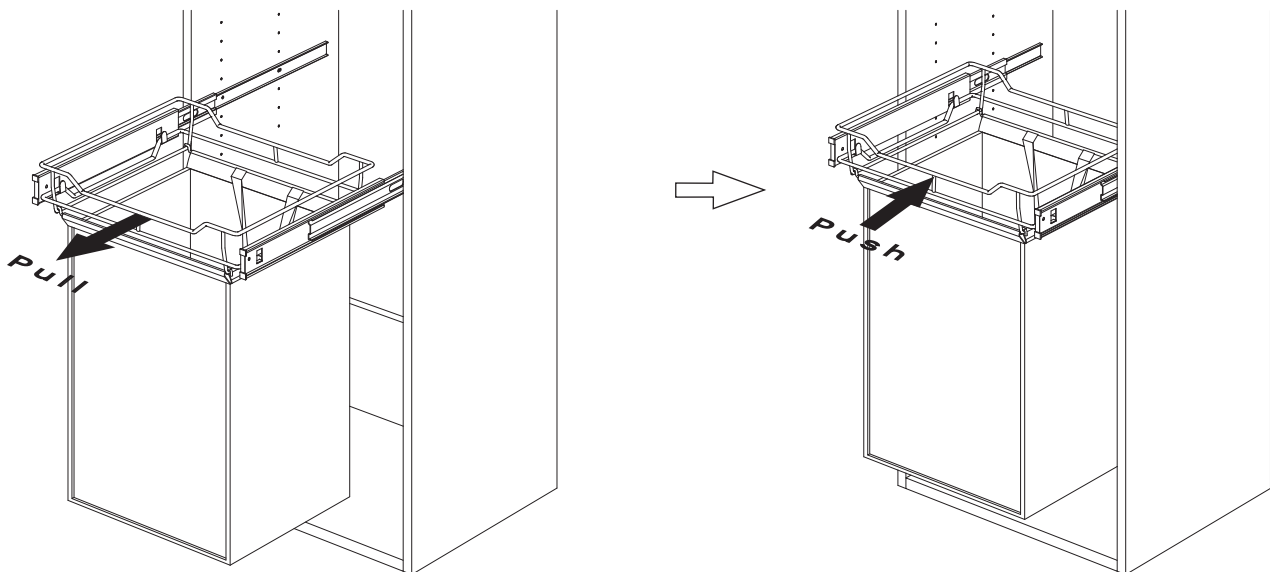

Installation Steps

- Hang bag by placing hooks over frame rails.

5 Test Movement

Pull hamper forward ➡ Push back to close.
Check smooth travel and soft-close function.

! Notes:

- Do not exceed **55 lbs** capacity.
- Hamper can be removed by lifting gently and pulling out.
- Re-check screws periodically.
- For non-standard cabinets: align carefully before fastening.
