⚠ WARNINGS ⚠

- Risk of fire or electric shock.
- If you are unfamiliar with electrical installations, consult a qualified electrician before proceeding.
- Do not make or alter any holes in the wiring enclosure or modify any electrical componentry.
- Min 90°C supply conductors.
- To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects.

CAUTIONS

- To ensure personal safety, proper grounding of the electrical fixture is required.
- The fixture must be wired in accordance with the National Electric Code (N.E.C.) and applicable local codes or ordinances.
- Access above ceiling required.
- Suitable for damp locations.
- 120-277 VAC, Power Selectable, 50/60 Hz
- Only compatible with a 0-10V dimmer.

WIRING INSTRUCTIONS

1. Ensure the power has been turned off by switching the circuit breaker to the off position or by removing the fuse from the fuse panel.
2. Select the desired color temperature and power setting.
3. Remove the ceiling tile at the appropriate location where the panel is to be installed. If needed, remove an adjacent ceiling tile for better accessibility.
4. Raise the panel above the the bar as shown in figure 1.
5. Using the provided wire nuts, connect the hot (black) wire to the white supply wire, the neutral (white) wire to the white supply wire, and the ground (green/bare copper) wire to the green/yellow wire. See figure 2.
6. If a low-voltage dimmer is used, connect the purple wire to the “+” (typically purple) wire and the pink wire to the “-” (typically gray) wire. See figure 2.
7. Fold the 4 protection brackets so they will be above the T-bar as shown in figure 3.
8. Slowly rest the fixture on the T-bar and make sure it fits properly.
9. Installation is now complete, restore power and the light is now operational.
