# TREX TRANSCEND®, TREX ENHANCE® AND TREX SELECT® DECKING CARE AND CLEANING GUIDE

All exterior building materials require cleaning. Generally, soap and water is all that is required to clean Trex Transcend, Enhance and Select decking products. For additional information, see below.

PROBLEM	SOLUTION
Dirt and Debris	The affected area should be sprayed off with a hose to remove surface debris. Use warm soapy water and a soft bristle brush to remove dirt and debris from the embossing pattern.
Using a Pressure Washer (General Cleaning Issues)	A pressure washer with <b>no greater</b> than 3100 psi* that has a fan attachment/adjustment and soap dispenser may be used to remove dirt or mud. Spray deck with soap, then follow by gently scrubbing each deck board with a soft bristle brush. Spray/rinse each individual deck board using a fan tip no closer than 8-in (203 mm) from the decking surface. <b>RINSE THOROUGHLY.</b> If dirty water from cleaning is left to dry, a film will remain on the decking surface.
Issues with Concrete, Cement, Mortar, or Stucco Dust	When working with cement, concrete, mortar, or stucco, protect the decking as much as possible in order to not get dust particles on the decking surface. These particles, once they get hot or wet, can cause a reaction on the decking surface and are very difficult to remove. If particles get on the decking surface, Trex recommends using Sakrete™ Concrete Dissolver ( <a href="http://www.sakrete.com/products/concrete-dissolver">www.sakrete.com/products/concrete-dissolver</a> ). <b>BE SURE TO FOLLOW MANUFACTURER'S INSTRUCTIONS.</b>
Hard Water Staining	Hard water is water with high amounts of mineral deposits like lime, silica and calcium. When the water dries, deposits are left behind, leaving unsightly spots on surfaces. This is not a defect of Trex products but an issue with the water itself. Generally, these deposits can be cleaned with white vinegar on decking surfaces. Rinsing is required, so care should be taken to not use hard water for this purpose. If hard water must be used, dry with a cloth or use a blower to dry surfaces. In some cases a deck brightener product may also be used to help clean hard water stains.
Chalk Lines	Most colored chalks are permanent and may discolor the surface. Use only Irwin Strait-Line® Dust-Off Marking Chalk (purple), available at <a href="http://www.irwin.com">www.irwin.com</a>
Tannins Due to Debris	Remove all debris from the deck using a hose or broom. Once the deck surface is dry, apply a deck "brightener"*** to the deck as directed by the manufacturer. Deck Brighteners contain oxalic acid, which will also remove tannins.
Ice and Snow	A plastic shovel may be used to remove snow from the deck. Use calcium chloride or rock salt to melt the snow and ice from the deck surface.
Oil, Grease and Food	All food spills should be removed as soon as possible. <b>The surface must be cleaned within seven days to maintain the stain warranty.</b> To remove, spray off with a hose and use warm, soapy water and a soft bristle brush to remove spills from the embossing pattern.
Mold and Mildew	If debris such as pollen and dirt is allowed to remain on the deck surface, mold can feed on the biofilm. Using a hose and warm, soapy water with a soft bristle brush is recommended to remove the food source and mold.

# TREX TRANSCEND®, TREX ENHANCE® AND TREX SELECT® DECKING CARE AND CLEANING GUIDE

PROBLEM	SOLUTION
Trex and Static Electricity	<p>While this is not common, static electricity can occur on walking surfaces in dry climates or in areas where dry winds and dust-borne particles lay on the decking surfaces. Static electricity can build up on occupants walking across any composite decking surface, including Trex, then produce a small static shock if they touch a grounded metal surface such as railing, door, etc.</p> <p>This condition can be decreased greatly with the use of a product call ACL Staticide®. Two products tested were General Purpose Staticide® and Heavy Duty Staticide®. Both are effective in greatly reducing static electricity on Trex decking surfaces. Apply full strength, using a mop on a dry decking surface, and allow to dry; no rinsing or diluting needed. Products are non-toxic, non-flammable, non-staining (will not change the color of decking surface), completely biodegradable and safe to use. Product is water-based and may require a second application after rain or other weather conditions. Over a period of time, the effect of static will dissipate naturally on the decking surface.</p> <p>See link for more information on product:  <a href="http://www.aclstaticide.com/antistatic_coatings.html">www.aclstaticide.com/antistatic_coatings.html</a></p>
Rubber Mats	<p>Use caution when using rubber-backed mats (i.e. welcome mats, etc.) as these may contain substances that can sometimes discolor or lighten the decking surface.</p>
Curving Trex Decking	<p>Trex recommends the use of the Trex® CustomCurve® to properly curve decking products. Note that Trex Enhance decking cannot be curved.</p>
Job Site Storage	<p>Store decking on a flat level surface and ALWAYS use proper supports (dunnage). <b>DO NOT</b> store directly on the ground. When stacking decking bundles, supports (dunnage) should start approximately 8-in (203 mm) from each end and be spaced approximately 2-ft (0.61 m) on center. In addition, supports (dunnage) should line up vertically/perpendicular to the decking product. Adjust support blocks (dunnage) accordingly if bundles are loose. For Select decking, Enhance decking, and 1x12 and 1x8 products, the maximum stack height is 12 bundles. For all other decking products, maximum stack height is 14 bundles <b>(IMPORTANT TO NOTE THAT PROPER DUNNAGE SPACING MUST BE IN PLACE FOR THESE HEIGHTS)</b>. When stacking multiple bundles, ensure that dunnage lines up vertically down through each stack. ALWAYS cover decking products on site until ready to be installed.</p>

\*Use of a pressure washer greater than 3100 psi could damage the boards and void the warranty.

\*\*Use of products containing bleach or acid can lighten the surface of Trex. Use in an inconspicuous area to determine whether you like the effect. Neither product will affect the structural integrity of Trex.

## TREX® RAILING CARE AND CLEANING GUIDE

Maintaining the appearance of your Trex® railing is important. The occasional wash is recommended as over time your railing may show signs of weathering as a result of exposure to the elements. The frequency of cleaning will depend on the environment and exposure to various types of elements.

### **TREX TRANSCEND®, SELECT®, AND ENHANCE® RAILING CARE AND CLEANING RECOMMENDATIONS**

Never use acetone or other solvents on Trex Transcend, Select, or Enhance railings as this can damage/dull the surface.

For color transfer issues (from attachment of baluster spacer), use Mr. Clean® Magic Eraser® Original or Plexus® Plastic Cleaner to help remove this. Note that Plexus Plastic Cleaner can only be used on PVC/acrylic railings and balusters and cannot be used on metal railings or metal balusters.

For small surface scratches, marks, or scuffs, use Dupli-Color® Scratch Seal® Clear Sealer Pen.

Hard water is water with a high amount of mineral deposits like lime, silica, and calcium. When the water dries, deposits are left behind, leaving unsightly spots or a “film-like” substance on railing and decking surfaces. For hard water issues on railing, these can be cleaned with Mr. Clean® Magic Eraser® Original or white vinegar. After applying products to surface, some gentle scrubbing would be needed on the surface to help loosen deposits, and rinsing is required, so care should be taken to not use hard water for this purpose, and if it must be used dry with a cloth or use a blower to dry railing.

### **TREX SIGNATURE® RAILING CARE AND CLEANING RECOMMENDATIONS**

**For installations where the atmosphere is influenced by bodies of salt water or other contaminant conditions, cleaning is required every 6 to 9 months. Failure to adhere to the required cleaning guidelines will void the Trex Limited Warranty with respect to any condition resulting from such failure. For purposes of any warranty claim, you should retain documentation of the cleaning date, cleaning method used, brand and amount of chemical used, and invoice from cleaning company (or a receipt for chemicals used).**

Regular cleaning may minimize the effects of weathering and remove dirt, grime and other build-up. The best method of maintaining the appearance of your Trex Signature® railing is to occasionally wash it using a solution of warm water and a non-abrasive, pH neutral detergent solution. The railing surface should be thoroughly rinsed after cleaning to remove all residues. Use a soft white cloth, sponge or a soft bristle brush.

**DO NOT clean Trex Signature® railing with solvents such as thinners or solutions containing chlorinated hydrocarbons, esters or ketenes.**

The following cleaners are recommended for cleaning TrexSignature® railing:

- » Formula 409® Cleaner Degreaser/Disinfectant
- » Spray Nine® Cleaner/Disinfectant
- » Simple Green® All Purpose Cleaner
- » Fantastik® All Purpose Cleaner
- » Windex® Cleaner
