## BLUE VIPER DISAPPEARING DYE (OPTIONAL)

The Blue Viper Disappearing Dye is designed to save you money, minimizing the amount of chemical used. You see how much you have sprayed, as well as where you have sprayed. This ensures you spray only the bad guys and keep the good. The dye also minimizes the chance of stepping in the chemical and tracking it through your yard. It is important to note that, after spraying onto your weeds, the dye will disappear in just a few hours.

- HOW TO USE: Mix with herbicides to temporarily mark sprayed areas.
- MIX RATE: 1 oz. Blue Viper Disappearing Dye with 16 oz. of water/chemical mixture.

### TIPS & WARNINGS:

- Blue Viper disappearing dye is a patented, non-hazardous, non-staining colorant.
- **Keep Out Of The Reach Of Children.** Avoid contact with eyes and skin.
- May be harmful if swallowed.
- Do not release concentrated color directly into the environment.
- See MSDS for additional information.
- Emergency Contact: ChemTec (800) 424-9300.

## BLUE-VIPER LIMITED WARRANTY

**DURATION OF THIS WARRANTY:** **Product is warranted for five years from date of purchase against manufacturer or workmanship defects.** Blue Viper warrants to the original purchaser of this product at retail that it is free from problems in materials and workmanship for the period specified above from the original date of purchase. This warranty does not apply to damage to the product resulting from accident, misuse, neglect, alteration, modification, tampering, or failure to follow instructions supplied with the product. This warranty does not cover normal wear and tear. The warranty shall be void if the product is used commercially.

If the product or any part of it should malfunction within the warranty period, telephone our **CUSTOMER SERVICE DEPARTMENT** at **(888) 243-4891**. We will repair or replace any part found to be defective upon our examination, but will not pay shipping costs or any other expenses. You must retain your sales receipt as proof of the date of purchase and include it with any return of the product. This warranty is valid only in North America.

**ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR CONSUMER USE, ARE LIMITED TO 1 YEAR.**  
BLUE VIPER COMPANY EXCLUDES LIABILITY UNDER THIS WARRANTY FOR ANY AND ALL INCIDENTAL AND CONSEQUENTIAL LOSS OR DAMAGES.

**Please do not return the sprayer to the retailer.**  
If you have a problem or questions, contact our consumer help line: **(888) 243-4891**

## CAUTION

• Before using any pesticide or any other spray material in your sprayer, READ THE LABEL ON THE SPRAY MATERIAL CONTAINER AND FOLLOW EXACTLY ITS INSTRUCTIONS FOR MIXING AND USE INCLUDING THE NEED FOR PROTECTIVE CLOTHING. Some spray materials are dangerous and should not be used in this sprayer as they can damage the sprayer or its parts, or may be harmful to the user. This could result in SERIOUS BODILY INJURY or PROPERTY DAMAGE.

- BEFORE USING YOUR SPRAYER, thoroughly INSPECT the sprayer. Be sure there are no loose parts.
- DO NOT USE if any parts appear to be damaged, discolored, brittle, loose.
- DO NOT use sprayer when point towards your head or body. Never allow any of the spray to land on your skin.
- DO NOT use hot or boiling liquids in sprayer since this may weaken or damage tank, pump or hose.
- Wear a long-sleeved shirt, pants, gloves, goggles or similar protective clothing when spraying.
- Do not leave residue or spray material in sprayer after use. It may harden and clog the sprayer or its parts.
- Empty, clean and drain sprayer tank and hose at end of each season according to directions.
- Do not smoke or eat while mixing spray materials or spraying, and wash up afterwards.
- Do no attempt to replace any parts on your sprayer. Other parts may not fit properly or may be weakened by spray materials and fail, resulting in SERIOUS INJURY by unexpected discharge of spray material.
- Do not submerge in water or allow staying wet.
- Do not remove screws in handle control end or sprayer end. No user service parts.

**WARNING:** Keep sprayer and all spray materials away from children and pets.

**Note:** While batteries can remain in the unit normally, for long term storage (ex: winter months) remove the batteries to prevent any chance of corrosion.

## DANGER

This sprayer operates with liquid under pressure from the pump to the spray nozzle (The tank is not pressurized). Failure to observe CAUTIONS and follow instructions for use and maintenance could result in INJURY or PROPERTY DAMAGE from discharge of spray material.

**DO NOT USE ANY FLAMMABLES IN THIS SPRAYER** as it is not designed nor intended for such use. Some spray materials can ignite or explode. Do not spray in an enclosed space, near an open flame such as found in a BBQ grill or water heater, near an electric motor or open switch, or any source of heat. **DO NOT SMOKE** while spraying. Use of flammables could result in SERIOUS INJURY or PROPERTY DAMAGE from unintended ignition or explosion.

**DO NOT USE ANY CAUSTICS OR ACIDS IN THIS SPRAYER**, since these can damage or weaken the sprayer and its parts, resulting in SERIOUS INJURY or PROPERTY DAMAGE from unintended discharge.

# BLUE VIPER™

PRECISION 3-IN-1  
BATTERY POWERED  
WEED SPRAYER

Thank you for purchasing the Blue Viper™ Weed Sprayer.

The Blue Viper provides a fast and easy way to spray your weeds with your favorite weed killer. You are going to be amazed with its precision and ease of use.

Every Blue Viper is pre-assembled and tested on our farm in Indiana, so you can get started spraying right away. We have included a quick start section with 3 simple steps. Take a minute to read the quick start section, check out the spraying tips, and of course, make sure you read over the warnings and cautions.

If you have a spare moment, visit our website: [www.blue-viper.com](http://www.blue-viper.com). You will be able to find information on how to use your new sprayer, the history behind the Blue Viper, short videos and our 5-Year Warranty Registration.

If you ever have any questions, our dedicated customer service staff will be happy to help! Phone: (888) 243-4891.

Sincerely,  
Danielle Paluchniak  
President

*P.S.: Our kids love using it to write on the concrete — just add clean, clear water and let them go for hours of fun!*

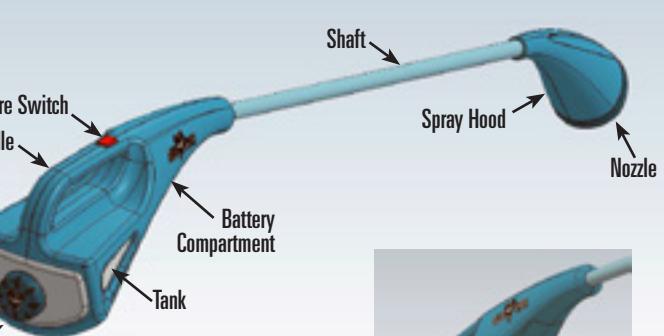

## ACTIVATE YOUR BLUE VIPER 5-YEAR WARRANTY TODAY!

### WARRANTY REGISTRATION

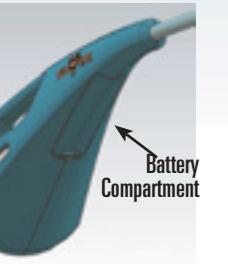

- To activate your warranty please go to [www.blue-viper.com/warranty](http://www.blue-viper.com/warranty) or call (888) 243-4891.
- Complete the warranty information
- Keep your sales receipt. You will need this in case of a warranty issue.

## QUICK START GUIDE

### 1. INSERT BATTERIES (not included)

- Insert 4 AA batteries into the battery compartment located on the underside of the tank (see diagram).
- Test batteries by briefly pressing the Pressure Switch and listen for the pump tank.

### 2. FILL THE SPRAYER

- Remove the Fill Cap.
- Inspect tank and tank filter, insuring they are free of debris.  
\*To protect the pump system, a fine meshed screen filter is located under the tank cap. Always insure the screen is in place before filling the tank.
- Carefully pour preferred liquid herbicide solution into 16 oz tank.
- Replace Fill Cap and hand tighten.

### TIPS & WARNINGS:

- Only use weed killers approved for use in spraying systems.
- Make sure you follow all instructions for mixing and safety precautions found on the weed killer packaging or website.

- Inspect the screen filter regularly and remove to clean if debris is noticed.

ON USING YOUR BLUE VIPER

### 3. START SPRAYING

*... this is where the fun begins*

Couple of things you should know about your Blue Viper before starting to spray. It has been designed to deliver the optimum amount of weed killer using a fixed rate fine mist and a 2" wide swath. This saves you money by using less weed killer since over spraying or soaking weeds is eliminated.

The fixed rate sprayer utilizes a self priming pump. The pump is activated by pressing and holding the pressure switch located on the handle. To get familiar with the misting spray pattern, we recommend filling the tank with water and practice spraying on a concrete surface.

To begin, hold the pressure switch down for a continual flow. Walking at a slow to normal pace, holding your arm and wrist in a comfortable manner to the side of your body, allowing the spray hood to move parallel and close to the ground. Spray just enough to make the area wet on top. Remember... you do not have to soak the area.

### 3 SPRAYING PATTERNS:

- **SPOT SPRAYING** (Precise placement of weed killer with no overspray. Reach between plants in mulch beds and gardens.) Place the Blue Viper hood on the ground over the weed that is to be killed. Press and release the pressure switch. Move and repeat as needed.

- **CONTINUOUS EDGING** (No stopping necessary with battery powered operation. Ideal for edging sidewalks, mulch beds, fence lines, patios and around trees.) Place the Blue Viper hood 1"-2" from the ground. Press and hold the pressure switch while starting to walk. Follow the edge of the area to be sprayed. Release switch when finished.

- **BROADCAST SPRAYING** (Covers larger areas. Perfect for gravel drives, walking paths, mulch beds, etc.) Place the Blue Viper hood 6"-8" from the ground. Press and hold the pressure switch. While walking backwards, move the hood left to right, to evenly cover the area. Release the switch when finished. Remember with weed and grass killers, you do not need to soak the ground for an effective kill.

ON USING YOUR BLUE VIPER

### TIPS & WARNINGS:

- There is always going to be some trial and error when first learning to use your Blue Viper. After you have sprayed a small area, stop and check to see where the product was applied.
- Remember to regularly inspect the nozzle for accumulated debris. Flush with water to clear if needed.
- Weather conditions and terrain must be considered when using the Blue Viper.
- Do not spray on windy days.
- Protective clothing must be worn in some cases.
- Be sure to read and follow all chemical labels.

## DONE SPRAYING, BEFORE YOU PUT IT AWAY

### CLEANING THE SPRAYER

- Pour out any remaining liquid and drain the tank completely
- Add clean water to the tank and swish around for a few seconds, then pour out
- Add a small amount of water to the tank and spray to remove residual materials from the pump and nozzle. Spray until all liquid is out of the tank
- If necessary, repeat steps 2 and 3 to insure the sprayer is clean

### TIPS & WARNING

- Some chemicals might damage the pump valves if allowed to soak untreated for a long period of time. Always flush the pump with water after use.
- Follow chemical manufacturers instructions on disposal of all waste from the sprayer
- If nozzle, valve or other parts seem clogged, remove the nozzle from under the spray shield and flush the entire line with water by filling tank with clean water and letting pump run. If your sprayer continually clogs, dirt or debris may have gotten into the tank. If so, empty the contents of the tank into a bucket and then rinse the tank clean. Then fill with clean water and run through system by activating the pump.

### WINTER STORAGE

Follow cleaning instructions, then make sure to run the pump dry (until nothing comes out of the nozzle) prior to storing. Liquid left in the sprayer will freeze and damage the sprayer.
