Prop 65: Cement Tile

Manufacturer

Villa Lagoon Tile

Product

Cement Tile

Proposition 65 Warning

⚠ WARNING: When cut or ground, cement tiles can expose you to Silica, crystalline (airborne particles of respirable size) which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

Remediation

When cutting or grinding cement tiles, or other concrete products, please use proper dust-remediation techniques, including but not limited to:

- Use **water to wet dust** before it becomes airborne, including during cleanup.
- Use cutting or grinding **tools meant to be used with water**, such as a “wet saw”.
- **Use high-quality respirators**, when in the presence of dry dust, such as N95 respirators, or respirator masks with P95 or P100 filters. Please note: these masks are only effective when properly fitted and maintained.
- **Shower and change into clean clothes** as soon as possible after dust exposure, to reduce contamination transfer.
