HERE'S HOW TO TAKE CARE OF ME

Hoya Heart

LIGHT

I grow best in a bright, sunny spot. I prefer at least six hours of indirect sun a day. The more light you can provide me, the better.

WATER

I like to be kept dry, I may only need watering once every two weeks. If in doubt, its best to stay on the drier side.

FOOD

Feed me once or twice a year during Spring and Summer with a fertilizer formulated for houseplants.

FEATURES

The Hoya Kerrii, also commonly known as the Hoya heart, is known as the Valentine or Sweetheart plant because of its heart shape form.

GROWING TIPS

Hoya Hearts have small root systems so they don't need repotting very often.

GIVE ME FRIENDS

(I play well with)

Snake plants, ZZ Plant, or other Cacti & Succulents
