

Easy Read Manometer Vacuum Gauge Installation Instructions

1. Select location on the vertical suction pipe where the vacuum gauge is to be mounted. Fix the gauge vertically to the pipe using the screws provided.

2. Remove end caps from both tube ends.

Warning: Do not ingest gauge fluid.

Caution: Gauge fluid will stain if spilled.

3. Allow fluid to settle in gauge for several minutes and then zero the gauge by sliding the tube until the tops of both columns align with the zero mark on the pressure scale.

4. Drill a 3/16" hole in piping 2 inches below the top of the gauge.

Positioning the hole below the top of the gauge will prevent condensation from potentially collecting in the u-tube gauge.

5. Insert vinyl tubing into either opening in gauge tube and push firmly.

6. Install end of the tubing into drilled hole. Apply caulking for airtight connection.

7. Fill in label using an indelible marker.

8. Remove backing and position label next to vacuum gauge ensuring the arrow is lined up with the gauge zero.
