

Engineered for a superior finish and designed for comfort and control, the TGEOS has a 500W / 4.5A motor that delivers ample power to a dual-mode 150mm / 6" sanding system. Advanced electronics provide variable speed control with a constant speed maintained under load. A slim-bodied grip is supported by the front bail handle, which can both swivel and rotate for excellent control and almost unlimited hand positions. In addition, the front palm grip enables compact operation when the bail handle is removed. Rubber overmoulds provide additional grip and comfort while the rear dust extraction port is well located for connection to a dust extraction system.

Selling Points

- Engineered for a superior finish & designed for greater comfort
- Dual mode with variable speed & consistent speed under load
- Switching between random & fixed orbit mode is easy using the selection lever
- Random orbit for large, high quality surfaces
- Eccentric motion gives a fine finish & removes the need for re-work
- Fixed/forced orbit for paint removal, renovation or rough work ensures a high rate of material removal
- Slim body & rotating, swivel handle for almost unlimited hand positions

What's in the Box

- Dust Extraction Adaptor
- Dust Bag
- Sanding Pad
- 6 x Sanding Discs (2 x 80, 2 x 120, 2 x 240 Grit)
- Spare Brush

Key Specifications

	Voltage	
	230-240V 50Hz	110-120V 60Hz
Power	500W	4.5A
No Load Speed	4000 - 12000rpm	
Plate Size	150mm	6"
Orbit Eccentricity	5mm	3/16"
Adjustable Bail Handle	Rotating & Swivel	
Paper Attachment	Hook & Loop	
Power On Neon	Yes	
Sanding Modes	Dual (Random & Fixed Orbit)	
Weight	2.5kg	5.5lbs
