

LED Ceiling Lights User Guide

STEP1

STEP1

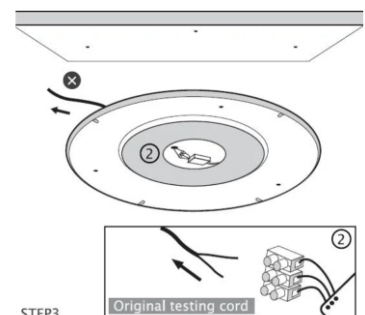

Open the lampshade by turning in counterclockwise.

STEP2

STEP2

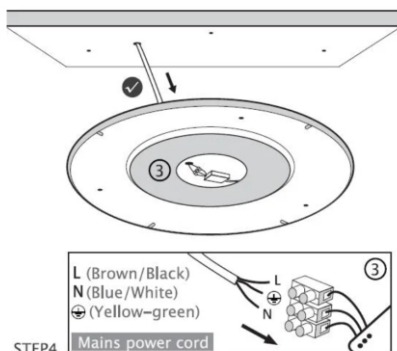

According to the screw bits on the lamp, drill holes in the ceiling. And then insert the plastic screw anchors into the drilling holes.

STEP3

STEP3

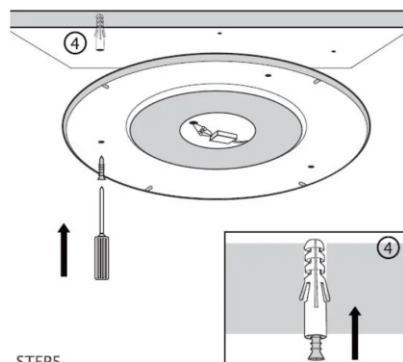

Remove the original testing cord of the lamp by loosening the screws in the wire connector of the lamp.

STEP4

STEP4

Pass your power cord through the hole of ceiling lamp chassis. Then connect the Neutral line, Live line and Ground wire of power cord into the corresponding wiring ports of connector.

STEP5

STEP5

Put screws into the screw bits of lamp chassis, and then fix the lamp chassis onto the ceiling.

STEP6

STEP6

Put on the lampshade to lamp chassis by turning in clockwise.

Note: For the item 1500016, its color temperature can be adjusted by turning on/off the power supply: turning the power off and on again, the color temperature will change. (Three color temperature changes in cycle.)
