

ATTENTION: This product can expose you to chemicals including crystalline silica, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

Please Note: the change from “WARNING” to “ATTENTION” applies to MFG Part #'s 3142, 3146, and T600. These are EPA Registered Pesticide products and EPA's Label Review Manual, Chapter 7, Section IV, Item 4 indicates the following:

Related information on California Proposition 65 warnings

Because of the potential for confusion, the Agency historically has not approved labels containing the terms “caution,” “warning,” or “danger,” unless it is the signal word for that label (e.g., “CAUTION: Wash hands before eating or smoking” on a label with the signal word of “CAUTION”). If the Prop 65 term would conflict with the EPA signal word, then registrants should use “Notice” or “Attention” for the Prop 65 statement so that it does not conflict with the EPA signal word.

<https://www.epa.gov/sites/production/files/2018-04/documents/chap-07-mar-2018.pdf>

Due to the fact that the Signal Word for these products is “CAUTION”, EPA will not allow “WARNING” to also be on the label as they see this as a conflict.
