## 3 Handles Shower Faucet Set

Style may vary by model, but the installation ways are the same

### 1、New installations

**NOTE!!**

- 1. Supply lines should be purged to clean impurities before connecting the unit.
- 2. The hot water supply should be connected to the left and the cold water supply to the right, when viewed from the operating position. If this is not taken into account can cause permanent damage to the cartridge.
- 3. Screw connections and test for leaks.
- 4. Using a spirit level on the cams, the mixer align horizontally, vertically and parallel to the wall.
- 5. Warm reminder:  
In the cold areas or the indoor temperature is less than 39°F in Winter, if no using the faucets for a long time, please turn off the inlet water valve and drain the remaining water inside the supply pipe, which can avoid the faucet damage caused by the expansion of the frozen water.

### 2、Installation Preparation

- 1. Read the instructions carefully before installing.
- 2. The installation must be performed by a qualified person.
- 3. Installation tools:

### 3、Accessory list

| No | Description              | Qty |

| 6  | Shower arm               | 1   |
| 7  | Decorative cover         | 1   |
| 8  | Allen-Key                | 1   |
| 9  | Screws bag               | 1   |

The diagram illustrates the installation of a shower system. On the left, a wall panel with a cross-shaped cutout is shown. To its right, a central valve body is depicted with four main outlets. A vertical pipe labeled 'Rain shower' extends upwards from the top outlet. Two horizontal pipes, labeled 'Hot' and 'Cold', extend to the left and right respectively. A vertical pipe labeled 'Tub spout' extends downwards from the bottom outlet. Each of these four pipes is shown with a coiled section of pipe tape being applied to its male end, indicating the first step of the installation process.

① A.Wrap the pipe tape to the prepared male water pipe and then connecting to the embedded shower valve. Pay attention to the connection of the water inlet and outlet signs.

B.Measure the installation position of the shower system on the wall according to the needs of the parts and the size of the embedded valve body. Confirming it and mark it with a pen.
