

## 18 x 22 in. Sump Basin

Model: SF20

Made in the USA

For sump applications, the SF20 is designed to hold a sump pump. It is ideal for basement applications where a submersible or pedestal sump pump is required. The single piece basin is injection molded structural foam polyethylene and provides superior structural toughness and reliability. The rim of the basin includes pre-drilled holes with metal inserts to accept the mounting and securing of a cover. The ultra-strong reinforced bottom will not buckle, deform or puncture, even under the harshest soil or ground water conditions. The SF20 will provide decades of reliable service.

### Specifications

- **Material:** Injection molded structural foam polyethylene
- **Inserts:** Metal
- **Weight:** 11 lbs.
- **Total Capacity:** 20 gallons

### Features and Benefits

- 20 U.S. gallon capacity
- Heavy duty structural foam injection molded construction
- Ultra strong, reinforced bottom will not flex
- Cover mounting metal inserts included on basin
- Gas and radon tight
- Odor free
- Dozens of cover options available
- Can be perforated with 48 factory drilled, 5/16" holes (Model
