

Item Number: A03818

WARNING (To reduce the risk of fire, electric shock, or personal injury):

1. We suggest installation by a **licensed electrician**.
2. Please read the instruction carefully and save it as you may need it at a later time.
3. Before you start, **NEVER** attempt any work without shutting off the electricity until the work is done.
 - A) Go to the main fuse, or circuit breaker, box in your home. Place the main power switch in the **"OFF"** position.
 - B) Place the wall switch in the **"OFF"** position.
4. Mounting surface should be clean, dry, flat, strong enough and 1/4" larger than the canopy on all sides. Any gaps between the mounting surface and canopy exceeding 3/16" should be corrected as required.
5. Make sure that the ceiling or wall can stand the weight of the lamp before installation.
6. Make sure the voltage you are using is **120V**. The maximum wattage is **40W** per bulb.
7. Keep the lamp away from acidic and alkaline substances in case of damaging the surface of the lamp.
8. When replacing bulbs, you should turn off or unplug the lamp and you must wait until it is cool as bulbs get hot quickly.
9. The safety instructions appearing in this manual are not meant to cover all possible conditions that may occur. It must be understood that common sense, caution and care must be used with any electrical products.

IMAGE FOR FINISHED PRODUCT:

TOOLS REQUIRED (NOT INCLUDED):

Before starting assembly and installation please prepare the needed tools as below picture

| | | | | |
|---|---|---|--|---|
|  |  |  |  |  |
| Ladder | Phillips head.flat blade screwdriver | Electrical tape | Pliers | Wire cutter/Stripper |

PARTS TYPE & QTY INCLUDING:

- (C) Single bar (1)
- (D) Green ground screw (1)
- (E) Canopy (1)
- (F) Collar ring (1)
- (G) Collar loop (1)
- (H) Quick link (2)
- (I) Chain (1)
- (J) Loop (1)
- (K) Stem (1)
- (L) Fixture loop assembly (1)
- (M) Metal lamp shade (1)

ACCESSORIES & QTY ENCLOSED:

- (A) Wire connector (3)
- (B) Mounting screw (2)

ASSEMBLY & INSTALLATION INSTRUCTIONS:

1. Carefully remove the fixture from the carton and check that all parts and accessories are included as shown in the above illustration.
2. Make pre-installation

Step A1: By measuring, determine the correct number of links needed for proper hanging height. Using the chain pliers, disconnect and discard the unwanted part.

Step A2: Screw the loop (J) onto the top of the metal lamp shade (K). Attach the quick link (H) to the chain (I) and the loop (J).

Carefully weave the fixture wires through the chain (I) in and out of every other link and stop just when you reach the top of chain (I). Gently pull the wires to ensure the wires are not stressed.

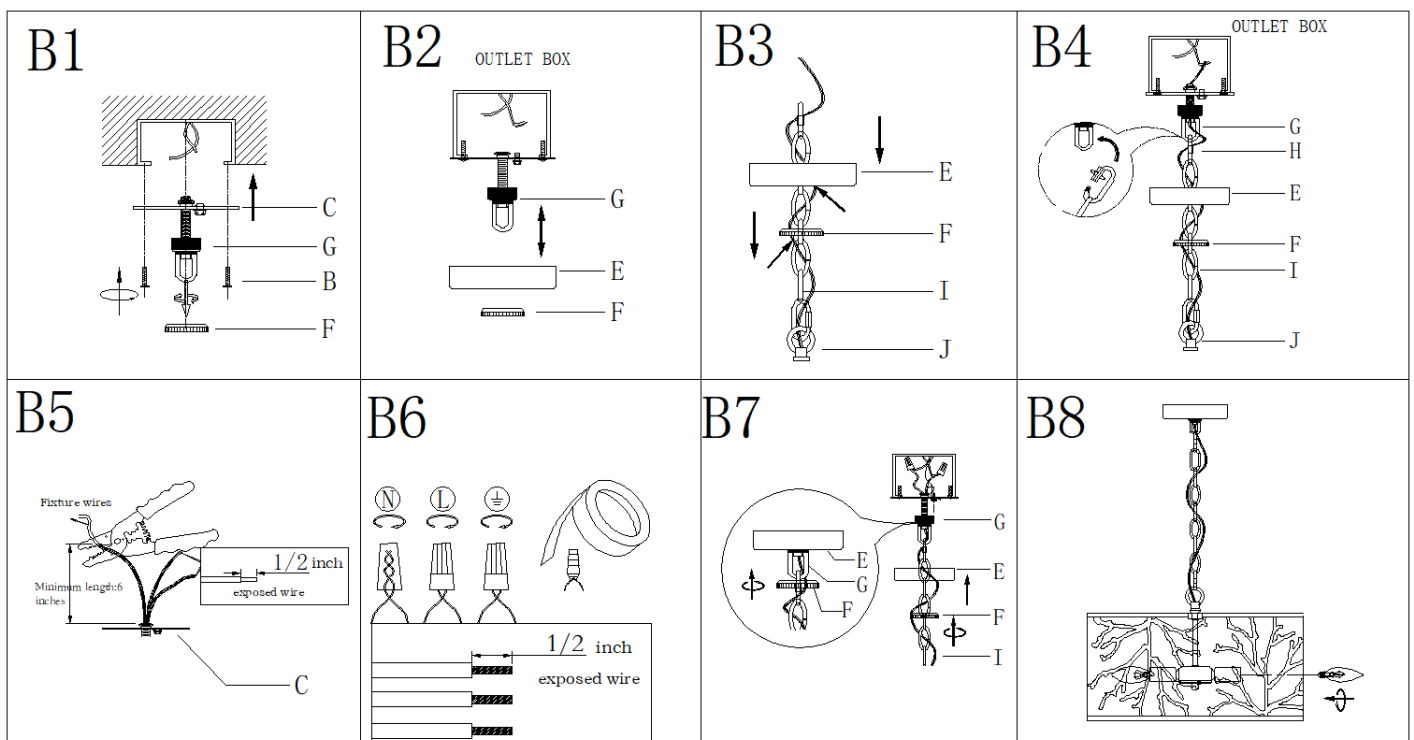

3 Turn off power

Before you start the installation, NEVER attempt any work without shutting off the electricity until the work is done.

A) Go to the main fuse, or circuit breaker, box in your home. Place the main power switch in the "OFF" position.

B) Place the wall switch in the "OFF" position.

4 Make installation

Step B1: Remove the collar ring (F) from collar loop (G). Attach the single bar (C) to the outlet box with mounting screws (B). **Note: the side of single bar marked "GND" must face out.**

Step B2: Pass canopy (E) over the collar loop (G) then secure with collar ring (F) to measure a proper height. Unscrew collar ring (F) from collar loop (G) and remove the canopy (E).

Note: The canopy (E) should be snug against the ceiling and the collar loop (G) should be screwed enough threads (no less than 6 threads) over the pre-assembled threaded nipple for more secure hanging. If not, adjust the height of the threaded nipple and collar loop (G) until the desired height is reached. Remove the collar ring (F) and canopy (E) and set them aside for later installation.

Step B3: Pass the chain (I) through the collar ring (F) then through the canopy (E).

Step B4: Open the quick link (H), attach the quick link (H) to the collar loop (G). Close the quick link (H).

Pass the fixture wires through the collar loop (G) to the top of the threaded nipple and gently pull to ensure the wires are not stressed.

Step B5: If needed, shorten the length of fixture wires. At this point, the remaining wire length measured above the bar (C) is at least 6".

Step B6: Make wire connections

Connect wires as below wires connection shown. **PLEASE NOTE THAT GROUND WIRE IS BARE COPPER WIRE, NEVER CONNECT OTHER WIRES TO GROUND WIRES.**

Connect ground wires according to the below chart

Connect wires according to the below chart

| Connect Black or Red Supply Wire to: | Connect White Supply Wire to: |
|---|---|
| Black | White |
| *Parallel cord (round & smooth) | *Parallel cord (square & ridged) |
| Clear,Brown,Gold or Black without tracer | Clear,Brown,Gold or Black with tracer |
| Insulated wire (other than green) with copper conductor | Insulated wire (other than green) with silver conductor |

*Note: When parallel wires (SPT I & SPT II) are used. The neutral wire is square shaped or ridged and the other wire will be round in shape or smooth (see illus.)

Twist wires together with plastic wire connector until tightly joined, and wrap each connector with approved electrical tape. Be sure that no wire strands are exposed and then carefully tuck all wires into the outlet box.

Step B7: Raise canopy (E) to ceiling and secure canopy (E) in place by tightening collar ring (F) onto collar loop (G).

Step B8: Install the bulbs (not included) (Please do not exceed the maximum wattage recommended on the socket.)

5. Check everything is already installed properly, then you could turn on the light. Enjoy!

CLEANING.

To clean, wipe the fixture with a soft cloth. Do not use abrasive materials such as scouring pads or powders, steel wool or abrasive paper.

ORDERING PARTS.

Keep this sheet for future reference in case you need to order replacement parts. All parts for this fixture can be ordered from the place of purchase. Be sure to use exact wording from illustration when ordering parts.
