

UNIVERSAL SHOWER HEAD FILTER

SAF

Easy To Install Replaceable Filter Element to Optimize Water Quality. Beneficial To Beauty & Health. SHF filter included.

SHOWER ARM FILTER FOR ANY SHOWER HEAD WITH EASY REPLACEABLE FILTER UNIT

HAIR PROTECTION

Showering in chlorinated water, a chemical frequently found in water supplies, can strip the oil from the hair causing it to become fragile and crack. Washing hair in filtered water helps to shield and repair its natural shine.

- Avoid dry and fragile hair
- Protect color treated hair
- Restore shine for body and hair

SKIN CARE

Chlorine can also strip away the skin's shielding oils, causing it to dry and crack, leading to permanent signs of aging. Protect your skin and feel refreshed by showering in filtered water.

- Protect skin's natural oils
- Prevent dry skin & wrinkling
- For softer-smoother skin
